In 1977, they introduced the Apple II - the first personal computer with color graphics and a keyboard. But by 1980, Apple's shine was starting to wear off. Increased competition combined with less than stellar sales of the Apple III and its follow-up, the LISA, caused the company to lose nearly half its market to IBM. Part IV. SHORT TALKS

Questions 11 to 13 refer to the following procedure.

Writing something for your business can be pretty intimidating. Well, you don't have to. Here's a simple checklist to follow. Firstly, take the topic of benefits, not features. Your customers don't care about you. They want to know "What's in it for me?" Secondly, write your benefit like you talk it. Use regular words. Read aloud what you've written. How does it sound? Thirdly, lose the weak words. Don't describe how your company may, might, or should help customers but talk about how your company will. Fourthly, Use a nice rhythm. Some sentences are long and some are short. Mix them up and keep things interesting. At last, re-read what you've done before publishing. Edit it necessarily.
